

Faisal A. Al-Sleemi (Information Department Manager, Tourism Information & Research Center, Saudi Commission for Tourism and National Heritage, Saudi Arabia)

We review the SF-MST and we do not have major notes except this one in [Page.37, In Measuring the employment aspects of tourism:](#)

[In Tourism Satellite Account: Recommended Methodological Framework 2008 in Para 3.36. Employment is an important variable in the economic analysis of productive activities..etc.\).](#)

So, I think if we add the below note for this section:

1. **Compensation.** (to identify quality of life that job gave to employees how work on tourism industries)
2. **National & Non-National.** (to identify the equity of local citizens how tourism impact to his life)

Another point:

I think if we have add formula like what is in TSA tables below (Red Color), to understand what is the conclusion index we use after final result of combined index. This will make it clear for countries.
