

**COMMITTEE ON STATISTICS
AND TOURISM SATELLITE ACCOUNT
Fifteenth meeting**

UNWTO Headquarters, Madrid, Spain

13 - 14 January 2015

**Item 13 of the agenda
Official country names and groupings – briefing on the M.49 Classification
“Standard Country or Area Codes for Statistical Use”**

The *Standard Country or Area Codes for Statistical Use* (Series M, N.49/Rev.4) presents a list of names of countries or areas used as a common reference for statistical processing purposes by the Statistics Division of the UN Secretariat. Each country is assigned a unique three-digit numerical code by the Statistics Division and a three-digit alphabetical code by the International Organization for Standardization (ISO). The M.49 system was first developed in 1969 to facilitate information transmission and the standardization of material for data processing, and has since evolved as an international standard coding system. It is also being used for other purposes outside statistical compiling and computing applications. The countries and areas listed in the *Standard Country or Area Codes for Statistical Use* are based on United Nations membership where member governments (and a few other UN observers and territorial entities under the jurisdiction of sovereign states) are providing data for statistical outputs of the Division.

The first list of *Areas Codes for Statistical Use* was printed in 1969, and revised in 1975, 1982, 1996 and 1999, the last major revision undertaken in all languages. Since then, regular updates and maintenance is posted both in English and French at the UN Statistics Division website at <http://unstats.un.org/unsd/methods/m49/m49.htm>. The full listing of current country codes is presented in Annex 1.

Management of the revision process:

In the case of the announcement/proclamation of a new sovereign nation or an official change of name or area nomenclature, the revision is governed by the respective General Assembly resolution. Country terminology is codified by the *United Nations Terminology Unit*. For other entities, including sub-national entities, terminology is determined in consultation with those member states that might have an interest in the matter. The consultations are lead by the UN Secretariat’s Office of Legal Affairs.

Regular updates and maintenance to the country names and three-digit numerical and alpha codes in the list of the *Standard Country or Area Codes for Statistical Use* are made only when following situations occur:

1. An official change in the name of country or area, while its geographical coverage remains the same. This change is not usually accompanied by a change of the country’s numerical code, but possibly by a change in the ISO alphanumeric

code, e.g. in the case of Burkina Faso, previously listed as Upper Volta: Codes 854, HVO changed to 854, BFA.

2. A major change in the geographical coverage of a country or area. This is generally accompanied by a change in the name of the country and numerical code used for statistical purposes. Possible scenarios include:
 - a) Two countries merge into one sovereign state as in the case of (276) Germany formerly (278) German Democratic Republic and (280) the Federal Republic of Germany
 - b) A country may separate or dissolve as (890) the Socialist Federal Republic of Yugoslavia where its states declared independence to become for instance (070) Bosnia and Herzegovina, (191) Croatia, etc.
 - c) A country may secede or achieve independence or autonomy from another as in the situation of (084) Belize which was formerly part of (826) United Kingdom.
 - d) A sovereign country agrees and allows its autonomous entities or territories to provide their own data to the Statistics Division. For example (248) Aland Islands, a province of Finland. These entities can therefore apply for their own unique numerical code and M.49 inclusion, if they meet the following 2 criteria:
 - i. Agreement of the territory to provide standard statistical data for international use (e.g. response to the questionnaire of the Monthly Bulletin of Statistics)
 - ii. Clearance and official agreement with the member state that the territory provide separate statistics for international reporting.

Partnership with ISO

The ISO is a non-governmental organization that promotes development of world standards with a view to facilitating international exchange of goods and services and to develop mutual co-operation in the sphere of intellectual, scientific, technological and economic activity. ISO assigns its codes according to its own very formal procedures. ISO 3166 *Codes for the representation of names of countries and their subdivisions* is a comprehensive and the most widely used standard solution for coding country names. In a special institutional and working arrangement with the UN Statistics Division, ISO 3166-1 publishes the three-digit numerical codes developed and maintained under the UN *Standard Country or Area Codes for Statistical Use* (Series M.49). Similarly the Statistics Division provides the alphabetical codes with its own listing for reference convenience. The two secretariats try to ensure consistency but neither set is fully inclusive of the other.

Groupings of countries

The geographical regions and groupings of countries and areas included at the M.49 website are not comprehensive but only a selection which are or may be used in the

compilation of statistics. In order to ensure consistency in statistics and for convenience, each country or area is shown in one region only. The macro geographical regions are arranged to the extent possible according to continents. Within these groupings more detailed component geographical regions are shown. The current groupings used are reflected in Annex 2. Details on the countries included in each group can be found at the M.49 website at <http://unstats.un.org/unsd/methods/m49/m49.htm>.

Annex 1: Listing of country and area codes.

Countries or areas, codes and abbreviations

Recent changes:

As of 25 October 2013, the country name "**Cabo Verde**" replaces this Member State's former name of Cape Verde (code 132).

As of December 2012, the designation of "**State of Palestine**" replaces "Occupied Palestinian Territory" (code 275).

As of July of 2011:

South Sudan (9/07/11- **728**
Sudan (9/07/11- **729** Refers to the new Sudan, now excluding the southern part.
Sudan (12/11/56-8/07/11) **736** Old code "retired" to be used for historical/statistical analysis.

(listing in alphabetical order) a/

Numerical code	Country or area name	ISO ALPHA-3 code
004	Afghanistan	AFG
248	Åland Islands	ALA
008	Albania	ALB
012	Algeria	DZA
016	American Samoa	ASM
020	Andorra	AND
024	Angola	AGO
660	Anguilla	AIA
